

Reagenta

CONTRACT MANUFACTURING

Reagenta is a trusted industrial partner in contract manufacturing of diagnostic products, such as reagents, controls, calibrators, EIA plates and kit components. Our success with long-standing manufacturing partnerships with industrial customers is recognized in high customer satisfaction results.

With over 30 years of expertise in manufacturing a broad spectrum of customized high quality products for life science industries, Reagenta professionals are able to meet requirements from an initial concept to the final product. While Reagenta is able to solve manufacturing challenges, contract manufacturing services enable our partners to focus on their core competence.

Reagents, solutions, controls, and calibrators

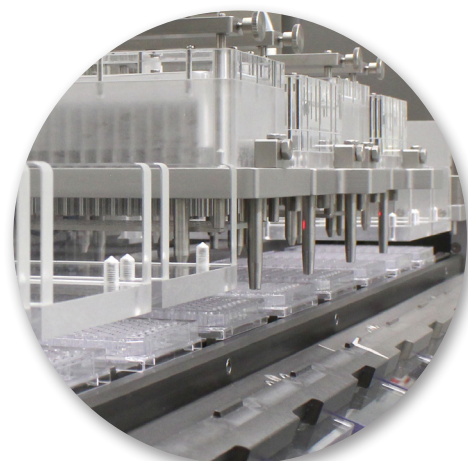

Reagenta provides manufacturing services from the initial customer need to a ready-to-use product.

- ▾ Products are manufactured according to the specifications and quality requirements given
- ▾ Packaging designed and manufactured in the agreed format
- ▾ Labeling according to the current legislation

Tailor-made EIA plates

Whether you need EIA assay kit development or EIA plate coating service, Reagenä's high capacity 96-well plate coating equipment enables flexible batch sizes.

- Custom coating service (includes coating, blocking, drying, packaging, quality control)
- Custom EIA assay manufacturing

Packaging services

- Dispensing of solutions into desired volumes from microlitres to IBC containers
- Packaging of test cassettes or other test components in sealed foil bags
